U. S. Department of Agriculture
WASHINGTON 25, D. C.

It is with pleasure we send this price list into your home for your consideration.

We want to express our sincere thanks to our many customers both old and new, and for the orders for bulbs that we received, and the many nice letters, and feel assured we will do our best to please you with quality bulbs and over count.

As satisfied customers are the best advertisement for any business, we add some new varieties every year, but cannot grow all the good Glads that are on the market. Hope we may have the privilege of serving you this year.

Bulbs were state inspected in field and storage.
Inspection Number 617.

ORDER EARLY—Please send order early to avoid disappointment, as many varieties will be sold out early. We ship as soon as weather permits.

PRICES AND TERMS—Full remittance should accompany all orders. All orders for less than \$2.00, please add 15¢ to cover postage; all orders over \$2.00 will be sent post-paid if taken from the retail list.

We will ship C. O. D. on request when 25 per cent of the amount is sent with the order.

5 bulbs at the 10 rate, for instance: 10 bulbs for \$1.00; 5 may be had for 50¢.

L means large. **M** medium. **S** small. **Blts.** Bulblets.

ABAGAIL—An early lavender pink that is similar in color to Minuet but much more vigorous growth. Opens 7 or more blooms on a tall straight spike. Increases very satisfactory. And looks like a very dependable variety. A color much needed in the commercial trade. **L** 2-30¢, 10-\$1.20; **M** 2-20¢, 10-80¢; **S** 3-25¢, 10-50¢.

GLAD CULTURE IN A NUTSHELL

1. **Planting Time**—April 1 to June 25.

2. **Site**—In full sunshine, well drained soil. Keep away from buildings, trees and shrubbery, stir soil often.

3. **Planting Depth**—Bulblets, 2 inches, small size 3 inches; medium 3 to 4 inches, large 4 to 6 inches. Rows—2 to 3 feet apart.

In Cutting Flowers, leave at least 4 leaves intact.

Dip—1 tablespoon Lysol; 1 gallon water. Soak bulb 4 to 6 hours immediately before planting.

We have used and find very good the "New Improved Ceresan," as a dip at planting time. It is very strong so must use with caution.

Use 1 oz. N. I. C. with 3 gal. water add 3 tablespoons drefit as a wetting agent. Do not put bare hands in solution. Soak 15 minutes, 30 minutes for bulblets. Do not soak longer or your bulbs will not grow. Plant while wet.

6. **Thrip Spray**—2 oz. 50% wettable D.D.T. to 3 gallon water. Mix well and spray weekly after 4 or 5 leaves appear till blooming starts. Also use D.D.T. spray, 2 ozs. D. D. T. 3 gallons water: Mix well, use the 50% wettable D. D. T. for spray and 5% for dust.

7. **Dig Bulbs** about 4 to 6 weeks after varieties are done blooming usually in October. Store in coolest part of basement after bulbs have been dried thoroughly in shade.

Use D. D. T. 5% for a light dusting when putting bulbs into storage. This will eliminate any danger of thrips feeding on your bulbs while in storage. But use the Lysol dip before planting.

BULB SIZES—Large bulbs are 1 1/4 inch and up. These are your best blooms for size and some earlier as a rule, and are designated by the letter "L."

Medium bulbs 3/4 to 1 1/4 inch. This size will give good bloom but not quite as early to bloom. Medium size is designated by the letter "M."

Small bulbs are 3/8 to 3/4 inch. This size is designated by the letter "S."

Plant small bulbs and bulblets as early as is possible to get them into the ground to give them a longer growing season, and keep weeds down. You will be surprised at your returns.

Glad's are easy to grow and anyone—even a beginner—can grow the finest show flowers.
